MODEL 7 MICROPHONE BOOMS

MODEL 6E BASE

J.L. Fisher provides professionals in the motion picture, television and video industries worldwide with excellent products and services at a very reasonable price. Our reputation is the best in this industry and as the industry leader we are committed to our customers. With award-winning equipment, knowledgeable staff and a state of the art facility, quality is first and foremost at J.L. Fisher. We listen to our customers to gain insight about their needs and continually improve our products and services. Our reputation for unsurpassed reliability gives you peace of mind.

Manufactured from the highest quality materials and components to meet the demanding needs of the entertainment industry, these stable, reliable Microphone Booms offer operators a wide variety of accessories. They also incorporate many features and options suggested by our customers.

J.L. Fisher booms are engineered and handcrafted to be the most reliable sound booms available and they have the lowest maintenance of any telescopic audio booms. Sound mixers and boom operators appreciate its outstanding dependability and ease of use... just ask them.

MODEL 7 MICROPHONE BOOM

The Model 7 Boom is a quiet, smooth and easy to use telescopic Microphone Boom with a variety of features and accessories that enable operators to position microphones in nearly any position. This Boom, originally designed for film production, is now used in both film and television production. The Model 7 has provided the industry with a long history of reliable service. It is available in four different lengths, providing sound personnel with a wide range of flexibility. The Model 7 Boom can be mounted overhead on Catwalk Stands (ACS, CS) or on stage flooring using the Model 6E Base. A feature available on our longer Booms is a Carbon Fiber inside tube that is lighter, more rigid and quieter than standard tubes. The Carbon Fiber inside tube is standard on the 29-Foot Boom and optional on the 26-Foot Boom. Also a new rotating facing rail handle provides more flexibility and ease of use at any angle.

*Available in 4 lengths from 20 to 29 feet
20 foot length shown*

*Shown with optional
Microphone Tilt Hanger*

MODEL 7 BOOM FEATURES

- NEW! Rotating Facing Rail Handle with Tilt
- NEW! Microphone Hanger Tilt Brake
- Four lengths available: 20-, 23-, 26- and 29-foot

- Taper ground inside tube
- Sound dampening outside tube cover
- Short rear projection

* For Booms with J.L. Fisher Tilt Hanger

NEW FACING RAIL HANDLE WITH TILT

MODEL 7 MICROPHONE BOOM

MICROPHONE TILT HANGER

110° TILT

Tilt Mechanism with two-diameter Microphone Holder

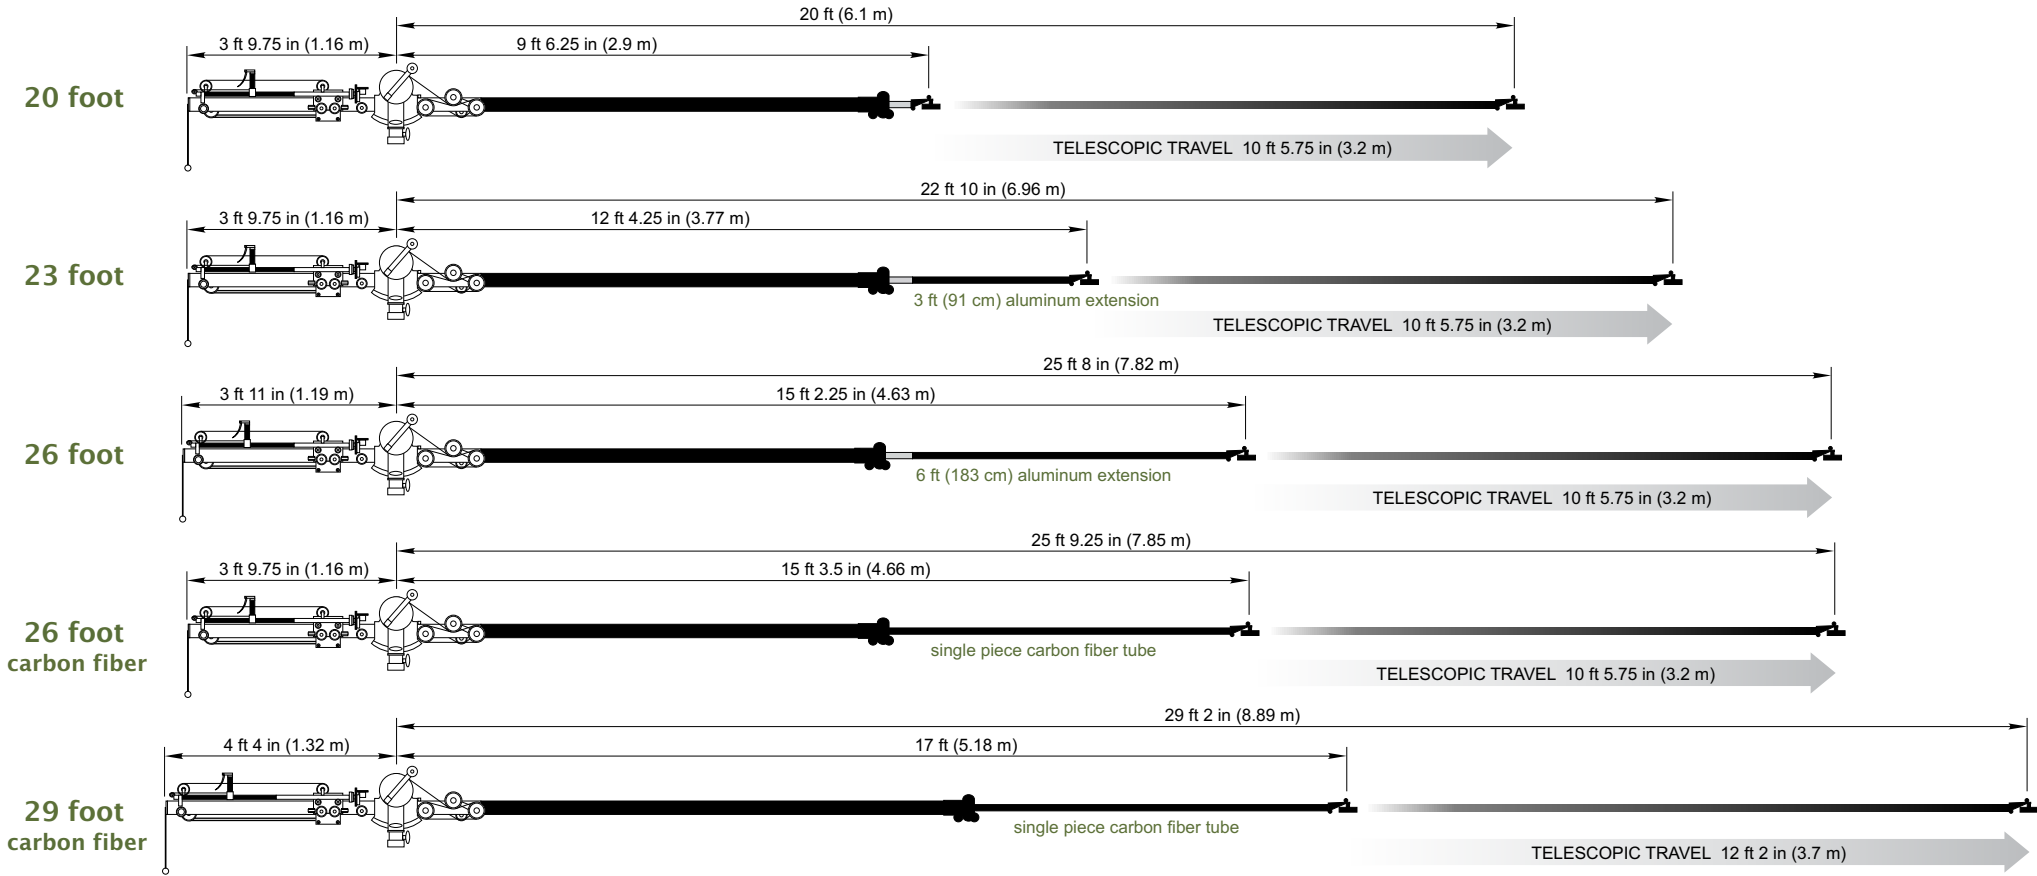

360° ROTATION

3/4 in or 1 in diameter (19 mm or 25.4 mm)

ALLOWS HANDLE TO ROTATE FOR COMFORT

FOUR LENGTHS AVAILABLE

Full 360° Rotation

The handle can also be locked to operate in the same way as the previous handle design. Simply select the operating position and tighten the handle set screw and it will remain in that position.

NEW TILT BRAKE IS FASTER & MORE RESPONSIVE

Completely re-designed for quicker and more precise microphone response. The locking knob has been relocated and the chain has been eliminated to reduce friction and eliminate drag.
